

Salvador Zepeda

contacto@salfredoze.com

First of all, I'm grateful for your time and interest in reading these words.

I have always been fascinated by art and mathematics, which inspired my studies abroad in México. My experience spans both design and engineering, allowing me to contribute in areas such as: Product Animation, Game Development, as well as Marketing and Growth, being my expertise focused on: 3D Visualization for Advertising Content.

Life it's about embracing the opportunities that entrepreneurship offers. Through diverse experiences in various industries and technologies, I've come to understand that success relies on: effective communication, attention to detail, and collaborative teamwork, aspects that go beyond technicalities.

That's why the quest for a bridge between technology and creativity ends here. My goal is to boost technology, to prompt workflows and level up teamwork and I'm prepared to face challenges, achieve goals, and share innovative ideas.

Thank you for reviewing and considering my application.

Sincerely,
Salvador
